

A Message from the Health & Wellness Center

May 2019

Dear Parents/Guardians,

Greetings from the Health & Wellness Center at The Knox School! As we close out our 2018-2019 school year, we wanted to remind all our families of the importance of having your child seen by a dentist for routine examinations and dental cleanings. The American Academy of Pediatric Dentists recommends that children be seen by a dentist two times per year. For our international and out-of-state families, ideal times to schedule these appointments with the dentist would be over the summer break and, again, during the March 2020 break.

Starting for the 2019-2020 academic year, all students, both new and returning, will be required to submit an annual **Dental Health Certificate**. This certificate must be completed by a dental health professional.

Timely submission of all health information is vital to help us prepare for the upcoming year. Please complete and submit your **Dental Health Certificate** and all other health requirements no later than **August 1st, 2019**. All health forms and requirements can be found online on your child's Magnus Health Account. I have also attached a copy of the new dental form below.

Should you have any questions or concerns regarding the health requirements, please contact the Health & Wellness Center. For any technical issues with Magnus Health, please contact Magnus Health directly at www.magnushealth.com or (877) 461-6831.

Best wishes for the summer and we will see you all in September!

Sincerely,
Aimee Roderick, RN
Director of Health & Wellness
