## Summer Assignment <br> AP Calculus AB

Directions: Show all work for the following problems, even for multiple choice. Only use a calculator when asked to do so. All of this material was learned in Algebra II and in Pre-Calculus.

Academic Integrity: All work should be completed independently and without the assistance of unapproved resources. Any work violating academic integrity will be subject to a " 0 " and any additional consequences as outlined in the Knox Academic Integrity Policy attached to this assignment.

Due Date: Your work is due the first day of your AP Calculus AB class. All late work will be subjected to a grade reduction or penalty as outlined in the course syllabus and copied below:

All major assignments not submitted on the due date will face a $10 \%$ deduction of max points per day for up to five (5) days and up to a $50 \%$ deduction.
Summer Assignments for AP Classes that are not submitted on time will result in the student being dropped from the course.

If you have any questions or concerns regarding this assignment, please contact the Dean of Academics, Mrs. Pergola, at dpergola@knoxschool.org .

The next three pages contain properties and rules that you should know off the top of your head. I included them for your reference in case you need a refresher.

## Properties of Exponents and Logarithms

## Exponents

Let $a$ and $b$ be real numbers and $m$ and $n$ be integers. Then the following properties of exponents hold, provided that all of the expressions appearing in a particular equation are defined.

1. $a^{m} a^{n}=a^{m+n}$
2. $\left(a^{m}\right)^{n}=a^{m n}$
3. $(a b)^{m}=a^{m} b^{m}$
4. $\frac{a^{m}}{a^{n}}=a^{m-n}, a \neq 0$
5. $\left(\frac{a}{b}\right)^{m}=\frac{a^{m}}{b^{m}}, b \neq 0$
6. $a^{-m}=\frac{1}{a^{m}}, a \neq 0$
7. $a^{\frac{1}{n}}=\sqrt[n]{a}$
8. $a^{0}=1, a \neq 0$
9. $a^{\frac{m}{n}}=\sqrt[n]{a^{m}}=(\sqrt[n]{a})^{m}$
where $m$ and $n$ are integers in properties 7 and 9 .
